PROFESSIONAL EXPERIENCE

Software Engineer — Payment Platform | Amartha Financial
Sep 2025 – Oct 2026 · Surabaya, Indonesia · On-site

- Refactored Transaction V2 architecture by integrating payment and payout adapters for unified disbursement and bank transfer processing.
- Designed and implemented metrics and alerting across consumer services and background jobs to strengthen system observability.
- Integrated BCA Virtual Account host-to-host APIs to support Virtual Account top-up transactions.
- Enhanced transaction reliability and fault tolerance by improving retry mechanisms and Dead Letter Queue (DLQ) processing.
- Improved Global Transaction History and Payment Widget, and migrated legacy transaction flows to a unified API.

Software Engineer — New Retail / Agent Network | Amartha Financial
Sep 2021 – Sep 2025 · Surabaya, Indonesia · Remote

- Contributed to the New Retail / Agent Network team within the Payments business unit.
- Enhanced agent onboarding and PPOB products, including loan repayment, remittance, withdrawal, pocket top-up, and cashback incentive management.
- Integrated payment services with internal systems and third-party PPOB providers, including Alterra and GoTo.
- Worked with Go, Google Cloud Platform (GCP), MongoDB, Grafana, Redis, and Apache Kafka.

Back End Engineer | PT Nusantara Sukses Teknologi (Nusatek.id)
Dec 2021 – Feb 2022 · Surabaya, Indonesia · Remote · Freelance

- Developed backend functionality using Go and PostgreSQL for client project requirements.

Back End Engineer | TwisCode Pte. Ltd.
Jan 2020 – Aug 2021 · Surabaya, Indonesia · On-site

- Developed and maintained applications for domestic and international clients, including sales management, car auction, and management information systems.
- Worked on backend services using Node.js, Go, PostgreSQL, and RabbitMQ.

Full Stack Engineer | Rigel Digital Solusi Indonesia
Jun 2017 – Jan 2020 · Surabaya, Indonesia · On-site

- Built a customized ERP system for a property client to support operational efficiency and resource management.
- Designed and maintained a Point of Sale (POS) system for a minimarket client, focusing on stability and performance.
- Delivered responsive company websites and a marketplace with product listings, transaction workflows, and customer engagement features.
- Worked across Vue.js, PHP, Laravel, and JavaScript.
